

**Write your answers.**

1. What is a niche? Give an example.
2. How are carnivores, herbivores, and omnivores alike and different?
3. Why are decomposers important in a food chain?
4. Use sequence words such as *first*, *next*, and *last* to explain the food chain. Use the graphic organizer to help you.

### Sequence

**First**

**Next**

**Last**
