## Science Chapter 5 Study Guide

Know the following words (Give more than just the definition!)

4	<i>C</i> .
	Grater
1.	CHALCI

<sup>2.</sup> Earthquakes

- 7. Mudslide
- 8. Plates
- 9. Tsunami

- 10. Volcano
- 11. Hot spots
- 12. Cubder-cone
- 13. Composite
- 14. Shield
- 15. Transform Boundary\*
- 16. Divergent Boundary\*
- 17. Convergent Boundary\*
- 1. What changes earth rapidly?
- 2. What can flooding cause?
- 3. What can an earthquake cause? (think of large natural disasters that are triggered by an earthquake)
- 4. What are the main differences between a mudslide and a landslide (This question will be worth 4 points!)
- 5. What are the three types of boundaries found in Earth's Crust and how do the plates move in one? (Worth 4 points!)
- 6. What can be done to prevent or reduce the damage done by landslides and mudslides? (Worth 4 points!)
- 7. Why do earthquakes occur along faults?
- 8. Draw and describe the three different types of volcanoes (worth 6 points)

<sup>3.</sup> Faults

<sup>4.</sup> Flood

<sup>5.</sup> Hot spot

<sup>6.</sup> Landslide

<sup>\*</sup>found in your notes
