

Write your answers.

1. What is the difference between an active meat-eating plant and an inactive meat-eating plant?
2. How do haustoria help parasitic plants?
3. Describe some methods of self-defense that help protect plants.
4. Think about the kinds of environments where the plants in this book live. Look at the pictures for clues. What kind of conclusion can you draw about where weird plants live? Use the graphic organizer for help.
